User Stories

Title: U1	Priority: H	Estimate: 4
User Story: As a registered user, I want to be able to login with my email and password so that I can access the job board feature of the web app.		
Acceptance Criteria: Given that the web app is accessed When the user clicks on the "login or signup" button Then the user is taken to the login page.		

Title: U2	Priority: H	Estimate: 4
User Story: As a new user, I want to be able to signup for a new account so that I can use my email and password to access the web app.		
Acceptance Criteria: Given the web app When a new user tries to login the web app Then the user is taken to the signup page where user can use their email, input their name, and create a new password.		

Title: U3	Priority: H	Estimate: 1
User Story: As a frontend developer, I want the "login or signup" button to be displayed on the homepage (public section) so that users can signup or login into the system.		
Acceptance Criteria: Given the web app When the user accesses the homepage (public section) Then the user can click on the "login or signup" button.		

Title: U4	Priority: H	Estimate: 1
User Story: As a frontend developer, I want a "view job board", and a "logout" button to be displayed on the homepage (private section) so that users can view their job board or choose to logout.		
Acceptance Criteria: Given the web app When the user accesses the homepage (private section) Then the user can click on the "view job board" button or the "logout" button.		

Title: U5	Priority: H	Estimate: 4
User Story: As a user, I want an "add new" job application feature so that I can add new applications to the job board.		
Acceptance Criteria: Given the job board page When accessed the "add new" button Then the user can add a new job application.		

Title: U6	Priority: H	Estimate: 2

User Story: As a backend developer, I want to integrate the job board feature with the firebase backend so that the frontend and backend works well together.		
Acceptance Criteria: Given the firebase console When integrated with the job board frontend Then the web app can work as a whole.		

Title: U7	**Priority:** H	**Estimate:** 5
User Story: As the client, I want at least two design prototypes for the web app so that I can discuss it with my team before confirming the design.		
Acceptance Criteria: Given the skeleton of the web app When accessed the frontend module Then the web app should look simple and pleasing.		

Title: U8	**Priority:** L	**Estimate:** 4
User Story: As a user, I want to be able to view the job board so that I can see all the job applications I have applied to in one table.		
Acceptance Criteria: Given the job board When accessed Then the user can view all their job applications.		

Title: U9	**Priority:** H	**Estimate:** 2
User Story: As a backend developer, I want to integrate the login feature with the firebase backend so that the frontend and backend works well together.		
Acceptance Criteria: Given the firebase console When integrated with the login frontend Then the web app can work as a whole.		

Title: U10	**Priority:** H	**Estimate:** 2
User Story: As a backend developer, I want to integrate the signup feature with the firebase backend so that the frontend and backend works well together.		
Acceptance Criteria: Given the firebase console When integrated with the signup frontend Then the web app can work as a whole.		

Title: U11	**Priority:** H	**Estimate:** 4
User Story: As a data analyst, I want to use excel and a business intelligence tool to create sample visualizations for the data so the admin can analyze what the club can do to help the members achieve a good career in the future.		
Acceptance Criteria: Given a set of sample data, create data visualizations that show what type of job is most likely available for the members.
